

TOUNLI Aboubaker

Cloud & DevOps engineering student, seeking a final-year internship (PFE)

Rabat, Morocco

☎ +212 781487896 ✉ aboubakertounli@gmail.com 🌐 Aboubaker TOUNLI

Currently in my final year of engineering school, I am looking for a stimulating graduation internship in Cloud and DevOps. With a strong team spirit, an analytical mindset, and a genuine drive to learn, I am determined to deliver real value in a challenging professional environment.

EDUCATION

National Institute of Posts and Telecommunications - INPT

2024 – 2027

Engineering Degree — Ubiquitous and Distributed Systems, Cloud and IoT

Rabat, Morocco

Lycée Technique Mohammedia

2022 – 2024

Preparatory Classes for Grandes Écoles (CPGE)

Mohammedia, Morocco

EXPERIENCE

Cloud Engineer Intern

July 2026 – August 2026

Clever Cloud Morocco × AGEL Partners

Casablanca, Morocco

- Contributed to the design of a **FinOps agent** for Clever Cloud: automated inventory of applications and add-ons, deterministic cost calculation, and optimization recommendations (rightsizing, idle instances, orphaned resources).
- Containerized the Agent with **Docker** and deployed it on **Clever Kubernetes Engine (CKE)** via a weekly **CronJob**, with reproducible in-cluster state provisioned by **Terraform**.
- Rolled the agent out on the internal organization; the first test delivered around **10% savings** on costs.
- Delivered two internal workshops (**Terraform**, **Kubernetes** / **CKE**) for the engineering team.

Huawei ICT Competitor (Cloud Track)

March 2026 – June 2026

Huawei

Shenzhen, China

- Awarded **3rd Prize worldwide** after ranking **1st nationally** and **2nd in Northern Africa**; selected among 200,000+ participants from 80+ countries to represent **Morocco** at the world finals in Shenzhen.
- Deployed a full cloud architecture covering secure virtual networks (**VPC**, subnets, **IAM**), migration to managed services, **Docker** containerization, **Kubernetes** orchestration, plus observability, centralized logging, and vulnerability analysis.

PROJECTS

DevSecOps CI/CD × GitOps Pipeline | *GitLab CI, SonarQube, Trivy, ArgoCD, Kubernetes, Docker*

- Built a **DevSecOps CI/CD** pipeline with GitLab CI to automate build, tests, code-quality analysis, and Docker image publishing.
- Gated releases with **SonarQube** (SAST) and **Trivy** (image scanning), then automated continuous delivery through a **GitOps** workflow with ArgoCD and Kubernetes.

Microservices Architecture & CI/CD on AWS | *ECS, ECR, ALB, CodePipeline, Docker, Node.js*

- Split a monolith into containerized microservices on **Amazon ECS**, storing images in **ECR** and routing traffic through an Application Load Balancer.
- Implemented an automated pipeline with **CodeCommit**, **CodeDeploy**, and **CodePipeline**, using Blue/Green deployments to avoid downtime.

Private Cloud with OpenStack | *OpenStack, Terraform, Virtualization, Networking*

- Deployed an All-in-One **OpenStack** private cloud covering virtualization, resource management, networking, and security groups, then automated configuration with **Terraform**.

TECHNICAL SKILLS

Cloud Platforms: Clever Cloud (PaaS, CKE), AWS (ECS, ECR, EC2, RDS, CodeCommit, CodeDeploy, CodePipeline), Huawei Cloud, OpenStack

Automatisation & Infrastructure as Code(IaC): Python, Shell Scripting, Terraform, Ansible

CI/CD & DevOps: GitLab CI, GitHub Actions, Jenkins, Docker, Kubernetes, ArgoCD

Security & quality: SonarQube, Trivy, IAM, Security Groups

Observability & Monitoring: Prometheus, Grafana

Software Development: Frameworks(Express.js, Spring Boot), Design Patterns , Architectures.

Autres: Git, Linux, Slack , LaTeX(Documentation)

LANGUAGES

English: Fluent

French: Fluent

Arabic: Native
